

Bugai Bogdan

Male, 21 years old, secondary education, no children, not married.

Position	Front-end Developer
E-mail	bugaiboga@gmail.com
Site	https://portfolio-bugai-bogdan.vercel.app
Telegram	https://t.me/userlorem
Work Schedule	full-time, part-time
Salary	Negotiable

Experience

6 months

March 2023 - September 2023 6 months	<div>Front-end Developer</div> <div>quadro design</div> <div><ul style="list-style-type: none">• Development and maintenance of web applications based on HTML, CSS, and JavaScript standards.• Creation and optimization of user interfaces to enhance usability and improve the user experience.• Use of modern frameworks and libraries to expedite development and ensure high-quality code.• Cross-browser and cross-platform compatibility: Ensuring correct rendering and functionality across various browsers and devices.• Testing and optimization of code for high performance and responsiveness in different environments.• Dynamic content and interaction: Development and integration of dynamic content using JavaScript to enhance the interactivity of web applications.• Implementation of AJAX requests for fast and efficient data exchange between the client and server.• Adaptive design: Creation of adaptive and responsive designs for optimal display on different devices and screens.</div>
---	--

- Performance optimization: Identification and elimination of bottlenecks in the code to improve overall application performance.
- Optimization of database queries and other resources to improve page loading speed.
- Collaboration and communication: Active interaction with other members of the development team to exchange ideas, solve problems, and achieve common goals.
- Participation in meetings and discussions to develop effective development strategies and improve processes.

Key Skills

- Development of server applications using Node.js.
- Experience with frameworks such as Express.js.
- Working with databases such as MongoDB, MySQL, PostgreSQL using Node.js.
- Development of client interfaces using React.
- Creation of components and containers for efficient state management.
- Experience with React Router for implementing navigation in single-page applications.
- Vue.js: Interface development using Vue.js and its ecosystem.
- Creation of single-file components (SFC) for convenient code organization.
- Integration of Vue.js into projects using module bundlers such as Webpack.
- Experience with HTML5 and CSS3 to create modern and responsive interfaces.
- Knowledge of modern styling approaches such as CSS-in-JS or preprocessors (e.g., Sass or Less).
- Experience with state management through Redux or Vuex.
- Working with databases, e.g., MongoDB, MySQL, PostgreSQL.
- Creation of RESTful APIs using Node.js and relevant libraries.
- Experience in developing and optimizing the server-side of applications.
- Experience with version control systems like Git.
- Knowledge of modern build and automation tools such as Webpack, Gulp, or Grunt.
- Ability to work with package managers such as npm or Yarn.
- Effective communication and collaboration in a development team.
- Experience in meetings, code reviews, and other collaborative development processes.
- Ability to design and build scalable and maintainable applications.
- Knowledge of design principles such as SOLID and their application in real projects.
- Experience integrating with external APIs and understanding the principles of RESTful.
- Knowledge of basic principles of web development security and their application in practice.
- Ability to quickly learn new technologies and approaches.

- Continuous commitment to self-development and staying updated with trends in web development.

Language Proficiency

Romanian	Native
Russian	Proficient
English	Basic

Additional Information

Willingness to travel	Open to business trips
-----------------------	------------------------

Nationality	Moldova
-------------	---------

About Me	I am an experienced JavaScript developer with a focus on Node.js, Vue.js, and React technologies. My professional experience includes successful development and support of high-traffic web applications. I strive for quality and innovative programming, possess excellent communication skills, and can effectively collaborate in a team. I am ready for continuous learning and aim to find effective solutions in the dynamic field of software development. My goal is to create modern and high-performing web applications that reflect the best standards in the software development industry.
